COMPUTER SCIENCE (BS)

Chair: Jeffrey J. McConnell, PhD

Introduction

A degree in computer science from Canisius College provides you with the experience and background required to continue with graduate school or to find employment in a variety of fields. Our graduates enjoy challenging and lucrative careers all over the country in many types of companies, from banking to the defense industry, from startups to major corporations. The computer science major provides you with an essential theoretical background along with practical programming experience and knowledge about many of the important and cutting edge areas of computer science, including cybersecurity, artificial intelligence, web development, software engineering, databases, operating systems, distributed computing, programming language design, and the social impact of computing.

For a more detailed description of the program, faculty, facilities, academic and co-curricular opportunities please go to the Computer Science website (https://www.canisius.edu/academics/programs/computer-science/).

Qualifications

Students must maintain a 2.0 GPA in the major and a 2.0 overall average to graduate with a degree in Computer Science.

Advisement

All students should have an advisor in the major and should contact the department directly to have an advisor assigned if they do not already have one. Meetings with academic advisors are required prior to students receiving their PIN for course registration each semester. All majors should work closely with their advisor in discussing career expectations, choosing their major electives, developing their entire academic program and planning their co-curricular or supplemental academic experiences.

Double Majors

Students who wish to expand their educational opportunities may decide to declare a double major. This decision may be based on career goals, planned graduate studies, and/or other student interests. Before a student declares a double major, it is important to meet with the appropriate academic departments for advisement. In order to declare a double major, the student must complete the appropriate double major request form and get the signature of each department chairperson and the appropriate associate dean.

Per college policy, each additional major requires a minimum of 15 credits that do not apply to the student’s first or subsequent major. Some double major combinations can be completed within the minimum 120 credit hour degree requirement, but in other cases additional course work may be required. Please note that students will receive only one degree, regardless of the number of majors they complete. Both (all) majors appear on a student’s transcript.

In the past, Computer Science majors have had double majors in many other areas, including Physics (http://catalog.canisius.edu/undergraduate/college-arts-sciences/physics/), Mathematics (http://catalog.canisius.edu/undergraduate/college-arts-sciences/mathematics-statistics/), Digital Media Arts (http://catalog.canisius.edu/undergraduate/college-arts-sciences/digital-media-arts/), Religious Studies (http://catalog.canisius.edu/undergraduate/college-arts-sciences/religious-studies-theology/), English (http://catalog.canisius.edu/undergraduate/college-arts-sciences/english/), and Classics (http://catalog.canisius.edu/undergraduate/college-arts-sciences/classics/).

Minors in Other Disciplines

Minors provide students the opportunity to pursue additional interests but generally do not require as many courses as a major. Minors generally range from five to eight required courses. To receive a minor, the student must complete at least 9 credit hours of coursework distinct from their other credentials (i.e., majors, other minors). The minors page (http://catalog.canisius.edu/undergraduate/minors/) provides a complete list of minors and provides links to each minor. Some majors and minors can be completed within the minimum 120 credit hour degree requirement, but in some cases additional coursework may be required. Students must complete the appropriate minor request form.

Students following the Interdisciplinary Track are required to complete a minor outside of computer science. A double major also satisfies this requirement. Students in the Science Track are not required to complete a minor but may choose to do so.

Curriculum

An Ignatian Foundation

All undergraduate students must complete either the Canisius Core Curriculum (http://catalog.canisius.edu/undergraduate/academics/curricular-information/core-curriculum/) or the All-College Honors Curriculum (http://catalog.canisius.edu/undergraduate/academics/curricular-information/all-college-honors-program/). Many schools refer to their college-wide undergraduate requirements as “general education” requirements. We believe that the core curriculum and the honors curriculum are more than a series of required classes; they provide the basis for a Jesuit education both with content and with required knowledge and skills attributes that are central to our mission.

Free Electives

Students may graduate with a bachelor’s degree in Computer Science with more but not less than 132 credit hours. Free electives are courses in addition to the Canisius Core Curriculum or All-College Honors Curriculum and major requirements sufficient to reach the minimum number of credits required for graduation. The number of credits required to complete a bachelor’s degree may vary depending on the student’s major(s) and minor(s).

Computer Science (BS)

CSC 330 & 330L Operating System Design and Distributed Computing and Operating System Design and Distributed Computing Laboratory 4

CSC 351 & 351L Comparative Programming Languages and Comparative Programming Languages Laboratory 4

CSC 360 & 360L Intelligent Systems and Intelligent Systems Laboratory 4

CSC 395 & 395L Software Engineering and Software Engineering Lab 4

Major Elective at the 300- or 400-level (see list below) 3-4

MAT 111 Calculus I 4

MAT 191 Introduction to Discrete Mathematics or MAT 230 Logic, Set Theory, and Proofs 4

Completion of either the science track or interdisciplinary track curriculum (variable credit required) 54-55

Major Elective Options

One additional course at the 300/400 level is required. These courses cover a variety of topics including web programming, advanced object oriented programming and design patterns, cryptography, app development, graphics, numerical analysis and bioinformatics. All these courses are either 3 or 4 credits. Faculty teach these courses on a rotating basis. To determine what is offered each semester consult the class schedule. Recent major electives include:

</tbody>
</table>

Tracks

Students must complete one of the following two tracks:

Interdisciplinary Track
Completion of an approved major or minor in another department or program.

Science Track
Select one of the following sequences:

Biology Sequence:
- BIO 111 & 111L: Introductory Biology I and Introductory Biology Laboratory I
- BIO 112 & 112L: Introductory Biology II and Introductory Biology Laboratory II

Chemistry Sequence:
- CHM 111 & 111L: General Chemistry I and General Chemistry I Laboratory
- CHM 112 & 112L: General Chemistry II and General Chemistry II Laboratory

Select one of the following math courses:
- MAT 141: Inferential Statistics and Computers for Science
- MAT 219: Linear Algebra
- MAT 351: Probability & Statistics I

Total Credits 15-16

1 Students can complete CHM 109 and CHM 110 in lieu of CHM 111.

Many courses at the 300-level and above are offered every two years on a rotating schedule. Thus, some students will take, for example, CSC 360 in their junior year, while the students who entered the previous year will take CSC 360 in their senior year.

The CSC department maintains a lab for use by majors and minors that contains a number of computers that provide access to departmental and college-wide software along with a printer.

CSC majors often get part-time jobs or paid internships in the Western New York region while still taking classes, though we do not formally require an internship. CSC 497 "Internship" is a way to earn credit for an internship, but the experience must include a significant learning component that does not overlap with required coursework and must be pre-approved by the department chair. The Internship cannot count as the CSC elective.

Roadmap

Recommended Semester Schedule for Major Course Requirements

Freshman
First Year
Fall: CSC 111 & 111L
Spring: CSC 112 & 112L

Sophomore
Second Year
Fall: CSC 213 & 213L
Spring: CSC 281 & 281L

Junior
Third Year
Fall: CSC 395
Spring: CSC 351 & 351L

Track course
Select one:
- CSC 320
- CSC 310 & 310L
- CSC Elective (1 needed)
Learning Goals & Objectives

Student Learning Goal 1
Majors will develop a computational solution to a problem.
Students will:
- Objective A: Translate a problem description to a formal representation;
- Objective B: Implement, justify and test acceptable computational solutions;
- Objective C: Describe the basic principles of artificial intelligence (AI).

Student Learning Goal 2
Majors will know the foundations of computing.
Students will:
- Objective A: Identify computational power and its limits;
- Objective B: Describe the operational details of computer systems;
- Objective C: Describe the operational details of programming languages.

Student Learning Goal 3
Majors will understand the social impact of computing.
Students will:
- Objective A: Describe the social impact of computing.

Minors

The following two minors are offered:
- Computer Science Minor (http://catalog.canisius.edu/undergraduate/college-arts-sciences/computer-science/computer-science-minor/)
- Computer Theory Minor (http://catalog.canisius.edu/undergraduate/college-arts-sciences/computer-science/computer-theory-minor/)

Please note, to receive a minor, a student must complete at least 9 credit hours of coursework distinct from their other credentials (i.e., majors, other minors). Please note that “ancillary/supporting” courses required for a major may still count as distinct courses as long as the remaining coursework still meets the 30 credit-hours required for a major.

Courses

CSC 108 Introduction to Web Computing 3 Credits
Introduction to computer science through web sites, web pages, web page programming, HTML, XML, CSS and JavaScript. The history and social impact of computers, networks and the World Wide Web are included in the course.
Corequisite: CSC 108L.
Fulfills College Core: Ethics, Field 7 (Mathematical Sciences)
Offered: fall & spring.

CSC 108L Introduction to Web Computing Laboratory 1 Credit
Required lab for CSC 108.
Corequisite: CSC 108.

CSC 111 Introduction to Programming 3 Credits
Algorithms, programming, computers, and applications to problem solving in Python.
Corequisite: CSC 111L.
Fulfills College Core: Field 7 (Mathematical Sciences)
Offered: every fall, spring, & summer.

CSC 111L Introduction to Programming Laboratory 1 Credit
Required lab for CSC 111.
Corequisite: CSC 111.

CSC 112 Data Structures 3 Credits
Basic concepts of object-oriented programming, recursion, and data structures, including lists, stacks, queues, and trees using Python.
Prerequisite: minimum grade of C in CSC 111 & CSC 111L. Corequisite: CSC 112L.
Offered: every fall, spring, & summer.

CSC 112L Data Structures Laboratory 1 Credit
Required lab for CSC 112.
Prerequisite: minimum grade of C in CSC 111 & CSC 111L. Corequisite: CSC 112.
Offered: every spring.

CSC 213 Large Scale Programming 3 Credits
Introduction to the design, implementation, and testing of larger software systems. Intensive instruction in Java including graphics and object-oriented design.
Prerequisite: minimum grade of C in CSC 112 & CSC 112L. Corequisite: CSC 213L.
Offered: once a year.

CSC 213L Large Scale Programming Laboratory 1 Credit
Required lab for CSC 213.
Prerequisite: minimum grade of C in CSC 112 & CSC 112L. Corequisite: CSC 213.
Offered: once a year.

CSC 253 Computer Hardware 3 Credits
Introduction to digital logic, Boolean algebra, hardware and computer organization. Overview of current architectures.
Prerequisite: minimum grade of C in CSC 111 & CSC 111L. Corequisite: CSC 253L.
Offered: once a year.

CSC 253L Computer Hardware Laboratory 1 Credit
Required lab for CSC 253.
Prerequisite: minimum grade of C in CSC 111 and CSC 111L. Corequisite: CSC 253.
Offered: once a year.

CSC 281 Automata and Algorithms 3 Credits
Formal language theory including finite and pushdown automata, grammars, Turing Machines and the Halting Problem. Provides an introduction to the design and analysis of algorithms, including classes of problems and methods for analysis.
Prerequisite: minimum grade of C in CSC 112 & CSC 112L. Corequisite: CSC 281L.
Offered: every spring.
<table>
<thead>
<tr>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 281L Automata and Algorithms Lab</td>
<td>1 Credit</td>
<td>Required lab for CSC 281. Prerequisites: Minimum grade of C in CSC 112 and CSC 112L. Corequisite: CSC 281. Offered: every spring.</td>
</tr>
<tr>
<td>CSC 310L Information Organization and Processing</td>
<td>1 Credit</td>
<td>Required lab for CSC 310. Prerequisite: minimum grade of C in CSC 112 and CSC 112L or minimum grade of C in CSC 213 &amp; CSC 213L. Corequisite: CSC 310L. Offered: occasionally.</td>
</tr>
<tr>
<td>CSC 320L The Social Impact of Computing</td>
<td>3 Credits</td>
<td>Examines the societal issues involved in computing such as accessibility, ethical issues, privacy, censorship, social media, and professional responsibilities. Includes applications of information literacy techniques to the major. Prerequisite: minimum grade of C in CSC 112 &amp; CSC 112L or a minimum grade of C in CSC 213 &amp; CSC 213L. Corequisite: CSC 320L. Offered: once a year.</td>
</tr>
<tr>
<td>CSC 330L Operating System Design and Distributed Computing</td>
<td>1 Credit</td>
<td>Required lab for CSC 330. Prerequisite: CSC 253, CSC 253L, &amp; either minimum grade of C in CSC 112 &amp; CSC 112L or minimum grade of C in CSC 213 &amp; CSC 213L. Corequisite: CSC 330. Offered: every fall.</td>
</tr>
<tr>
<td>CSC 351 Comparative Programming Languages</td>
<td>3 Credits</td>
<td>A study of programming languages and their implementations. Programming in logical and functional programming languages is included. Prerequisite: minimum grade of C in CSC 112 &amp; CSC 112L or minimum grade of C in CSC 213 &amp; CSC 213L. Corequisite: CSC 351L. Offered: every fall.</td>
</tr>
<tr>
<td>CSC 360 Intelligent Systems</td>
<td>3 Credits</td>
<td>An introduction to intelligent systems including logic and rule-based systems, machine learning, and applications of AI. Prerequisite: completion of MAT 191 or MAT 230 and minimum grade of C in either CSC 112 &amp; CSC 112L or CSC 213 &amp; CSC 213L. Corequisite: CSC 360L. Offered: 2020-2021, 2022-2023.</td>
</tr>
<tr>
<td>CSC 360L Intelligent Systems Laboratory</td>
<td>1 Credit</td>
<td>Required lab for CSC 360. Prerequisite: completion of MAT 191 or MAT 230 and minimum grade of C in either CSC 112 and 112L or in CSC 213 &amp; CSC 213L. Corequisite: CSC 360L. Offered: occasionally.</td>
</tr>
<tr>
<td>CSC 371L Cybersecurity Principles Lab</td>
<td>1 Credit</td>
<td>Required lab for CSC 371. Prerequisite: CSC 310 and CSC 310L; may be taken concurrently. Corequisite: CSC 371L. Offered: every fall.</td>
</tr>
<tr>
<td>CSC 380L Web Development Laboratory</td>
<td>1 Credit</td>
<td>Required lab for CSC 380. Prerequisite: minimum grade of C in CSC 111 and 111L. Corequisite: CSC 380L. Offered: occasional.</td>
</tr>
<tr>
<td>CSC 391L Computer Science Junior Seminar</td>
<td>1 Credit</td>
<td>Topic-focused exploration involving students and faculty. Prerequisite: permission of instructor.</td>
</tr>
<tr>
<td>CSC 400L Special Topics in Computing Laboratory</td>
<td>1 Credit</td>
<td>Required lab for CSC 400. Prerequisite: Minimum grade of C in CSC 281, CSC 281L, MAT 111 and in either MAT 191 or MAT 230. Corequisite: CSC 400L. Restriction: must be junior or senior Computer Science major. Offered: 2019-2020, 2021-2022.</td>
</tr>
</tbody>
</table>
CSC 480 Research Experience 0 Credits
Research project done in conjunction with a faculty advisor.
Offered: every fall & spring.

CSC 481 Research Experience 1 Credit
Research project done in conjunction with a faculty advisor for credit.
Offered: every fall & spring.

CSC 491 Computer Science Senior Seminar 1 Credit
Topic-focused exploration involving students and faculty.
Prerequisite: permission of instructor.

CSC 497 Internship 1-3 Credits
Special projects for local institutions/businesses. Must be related to a specific focused task and involve a significant learning component. Internships require an application and approval by the associate dean. Credit is not given simply for a part-time job. Approved project proposal and results documentation required. Does not count as a CSC elective.
Prerequisite: permission of chair & associate dean.

CSC 498 Independent Project 3 Credits
A directed project course that includes research, design, and implementation of a software system.
Prerequisite: permission of instructor.

CSC 499 Independent Study 1-4 Credits
An in-depth study of a specific computing topic. Independent studies require an application and approval by associate dean.
Prerequisite: junior or senior standing; & permission of instructor, chair, & associate dean.
