COMPUTER SCIENCE (BS)

Program Director: Jeffrey J. McConnell, PhD (mcconnel@canisius.edu)

Introduction

A degree in computer science from Canisius College provides you with the experience and background required to continue with graduate school or to find employment in a variety of fields. Our graduates enjoy challenging and lucrative careers all over the country in many types of companies, from banking to the defense industry, from startups to major corporations. The computer science major provides you with an essential theoretical background along with practical programming experience and knowledge about many of the important and cutting edge areas of computer science, including cybersecurity, artificial intelligence, web development, software engineering, databases, operating systems, distributed computing, programming language design, and the social impact of computing.

Qualifications

Students must maintain a 2.0 GPA in the major and a 2.0 overall average to graduate with a degree in Computer Science.

Advisement

All students should have an advisor in the major and should contact the department directly to have an advisor assigned if they do not already have one. Meetings with academic advisors are required prior to students receiving their PIN for course registration each semester. All majors should work closely with their advisor in discussing career expectations, choosing their major electives, developing their entire academic program and planning their co-curricular or supplemental academic experiences.

Double Majors

Students who wish to expand their educational opportunities may decide to declare a double major. This decision may be based on career goals, planned graduate studies, and/or other student interests. Before a student declares a double major, it is important to meet with the appropriate academic departments for advisement. In order to declare a double major, the student must complete the Major/Minor Declaration form. This form will be submitted electronically and reviewed and approved by each department chairperson as well as the appropriate associate dean.

Per college policy, each additional major requires a minimum of 15 credits that do not apply to the student’s first or subsequent major. Some double major combinations can be completed within the minimum 120 credit hour degree requirement, but in other cases additional course work may be required. Please note that students will receive only one degree, regardless of the number of majors they complete. Both (all) majors appear on a student’s transcript.

In the past, Computer Science majors have had double majors in many other areas including Mathematics, Digital Media Arts, Religious Studies, English, and Classics.

Minors in Other Disciplines

Minors provide students the opportunity to pursue additional interests but generally do not require as many courses as a major. Minors generally range from five to eight required courses. To receive a minor, the student must complete at least 9 credit hours of coursework distinct from their other credentials (i.e., majors, other minors). The complete list of minors is available on the Canisius website and in the catalog and provides links to each minor. Some majors and minors can be completed within the minimum 120 credit hour degree requirement, but in some cases additional coursework may be required. Students must complete the appropriate minor request form.

Students following the Interdisciplinary Track are required to complete a minor outside of computer science. A double major also satisfies this requirement. Students in the Science Track are not required to complete a minor but may choose to do so.

Curriculum

An Ignatian Foundation

All undergraduate students must complete either the Canisius Core Curriculum or the All-College Honors Curriculum. Many schools refer to their college-wide undergraduate requirements as “general education” requirements. We believe that the core curriculum and the honors curriculum are more than a series of required classes; they provide the basis for a Jesuit education both with content and with required knowledge and skills attributes that are central to our mission.

Free Electives

Students may graduate with a bachelor’s degree in Computer Science with more but not less than 120 credit hours. Free electives are courses in addition to the Canisius Core Curriculum or All-College Honors Curriculum and major requirements sufficient to reach the minimum number of credits required for graduation. The number of credits required to complete a bachelor’s degree may vary depending on the student’s major(s) and minor(s).

Computer Science (BS)

CSC 330 Operating System Design and Distributed Computing and Operating System Design and Distributed Computing Laboratory 4
CSC 351 Comparative Programming Languages and Comparative Programming Languages Laboratory 4
CSC 360 Intelligent Systems and Intelligent Systems Laboratory 4
CSC 395 Software Engineering and Software Engineering Lab 4
Major Elective at the 300- or 400-level (see list below) 3-4
MAT 111 Calculus I 4
MAT 191 Introduction to Discrete Mathematics or MAT 230 Logic, Set Theory, and Proofs 4
Completion of either the science track or interdisciplinary track curriculum (variable credit required)

Total Credits 54-55

Major Elective Options
One additional course at the 300/400 level is required. These courses cover a variety of topics including web programming, advanced object oriented programming and design patterns, cryptography, app development, graphics, numerical analysis and bioinformatics. All these courses are either 3 or 4 credits. Faculty teach these courses on a rotating basis. To determine what is offered each semester consult the class schedule. Recent major electives include:

Total Credits 15-16

1 Students can complete CHM 109 and CHM 110 in lieu of CHM 111.

Many courses at the 300-level and above are offered every two years on a rotating schedule. Thus, some students will take, for example, CSC 360 in their junior year, while the students who entered the previous year will take CSC 360 in their senior year.

The CSC department maintains a lab for use by majors and minors that contains a number of computers that provide access to departmental and college-wide software along with a printer.

CSC majors often get part-time jobs or paid internships in the Western New York region while still taking classes, though we do not formally require an internship. CSC 497 “Internship” is a way to earn credit for an internship, but the experience must include a significant learning component that does not overlap with required coursework and must be pre-approved by the program director. The Internship cannot count as the CSC elective.

Track course
Learning Goals & Objectives

Student Learning Goal 1

Majors will develop a computational solution to a problem. Students will:

- Objective A: Translate a problem description to a formal representation;
- Objective B: Implement, justify and test acceptable computational solutions;
- Objective C: Describe the basic principles of artificial intelligence (AI).

Student Learning Goal 2

Majors will know the foundations of computing. Students will:

- Objective A: Identify computational power and its limits;
- Objective B: Describe the operational details of computer systems;
- Objective C: Describe the operational details of programming languages.

Student Learning Goal 3

Majors will understand the social impact of computing. Students will:

- Objective A: Describe the social impact of computing.

Minors

The following two minors are offered:

- Computer Science Minor (http://catalog.canisius.edu/undergraduate/college-arts-sciences/computer-science/computer-science-minor/)
- Computer Theory Minor (http://catalog.canisius.edu/undergraduate/college-arts-sciences/computer-science/computer-theory-minor/)

Minors are an important part of the undergraduate curriculum. If students declare a minor by sophomore year, they can usually complete it in a timely manner. Students should work with their advisor to determine if it is possible that the minor can be completed by graduation.

Courses

CSC 108 Introduction to Web Computing  
Introduction to computer science through web sites, web pages, web page programming, HTML, XML, CSS and JavaScript. The history and social impact of computers, networks and the World Wide Web are included in the course.  
Corequisite: CSC 108L.  
Fulfills College Core: Ethics, Field 7 (Mathematical Sciences)  
Offered: fall & spring.

CSC 108L Introduction to Web Computing Laboratory  
1 Credit  
Required lab for CSC 108.  
Corequisite: CSC 108.  
Offered: fall & spring.

CSC 111 Introduction to Programming  
3 Credits  
Algorithms, programming, computers, and applications to problem solving in Python.  
Corequisite: CSC 111L.  
Fulfills College Core: Field 7 (Mathematical Sciences)  
Offered: every fall, spring, & summer.

CSC 111L Introduction to Programming Laboratory  
1 Credit  
Required lab for CSC 111.  
Corequisite: CSC 111.  
Offered: every fall, spring, & summer.

CSC 112 Data Structures  
3 Credits  
Introduction to object-oriented programming, recursion, and data structures, including lists, stacks, queues, trees and maps. Rudimentary discussion of analysis of algorithms. Python language is used.  
Prerequisite: minimum grade of C in CSC 111 & CSC 111L.  
Corequisite: CSC 112L.  
Offered: every fall, spring, & summer.

CSC 112L Data Structures Laboratory  
1 Credit  
Required lab for CSC 112.  
Prerequisite: minimum grade of C in CSC 111 & CSC 111L.  
Corequisite: CSC 112.  
Offered: every spring.

CSC 200 Computational Thinking on the Internet  
3 Credits  
This course provides an in-depth dive into the Internet, as a user, creator, and member of a society impacted by its development and day to day use. Students will learn the history of the Internet along with common technologies, uses, and the societal issues posed by the constantly developing landscape of Internet customs, expectations, and laws. Students will also learn basic concepts of web development and deploy their own webpage. In addition, students will learn about cyberethics through classroom discussions and engage with case studies related to modern day cases in cyberethics. The course will wrap up with learning about networking principles and the underlying architecture of the Internet.  
Fulfills College Core: Ethics, Field 7 (Mathematical Sciences)  
Offered: every fall & spring.

CSC 213 Large Scale Programming  
3 Credits  
Introduction to the design, implementation, and testing of larger software systems. Intensive instruction in Java including graphics and object-oriented design.  
Prerequisite: minimum grade of C in CSC 112 & CSC 112L.  
Corequisite: CSC 213L.  
Offered: every spring.
CSC 213L Large Scale Programming Laboratory  
Required lab for CSC 213.  
Prerequisite: minimum grade of C in CSC 112 & CSC 112L. Corequisite: CSC 213.  
Offered: every spring.

CSC 253 Computer Hardware  
Introduction to computer hardware and organization, focusing on digital logic components and Boolean logic. Assembler programming is used.  
Prerequisite: minimum grade of C in CSC 112 & CSC 112L, can be taken concurrently. Corequisite: CSC 253L.  
Offered: every fall.

CSC 253L Computer Hardware Laboratory  
Required lab for CSC 253.  
Corequisite: CSC 253.  
Offered: every fall.

CSC 281 Automata and Algorithms  
Formal language theory including finite and pushdown automata, grammars, Turing Machines and the Halting Problem. Provides an introduction to the design and analysis of algorithms, including classes of problems and methods for analysis.  
Prerequisite: minimum grade of C in CSC 112 & CSC 112L. Corequisite: CSC 281L.  
Offered: every fall.

CSC 281L Automata and Algorithms Lab  
Required lab for CSC 281L.  
Prerequisites: Minimum grade of C in CSC 112 and CSC 112L. Corequisite: CSC 281L.  
Offered: every fall.

CSC 310 Information Organization and Processing  
Databases, SQL, and NOSQL systems, along with concepts of normalization and database design. Rudimentary discussion of data ethics and security. MySQL and MongoDB used.  
Prerequisite: minimum grade of C in CSC 112 & CSC 112L or a minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 310L.  
Offered: every fall & spring.

CSC 310L Information Organization and Processing Laboratory  
Required lab for CSC 310.  
Prerequisite: minimum grade of C in CSC 112 and CSC 112L or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 310L.  
Offered: occasionally.

CSC 320 The Social Impact of Computing  
Examines the societal issues involved in computing such as accessibility, ethical issues, privacy, censorship, social media, and professional responsibilities. Includes applications of information literacy techniques to the major.  
Prerequisite: minimum grade of C in CSC 112 & CSC 112L or a minimum grade of C in CSC 213 & CSC 213L. Fulfills College Core: Advanced Writing-Intensive, Ethics  
Offered: once a year.

CSC 330 Operating System Design and Distributed Computing  
The design of operating system software, distributed applications, client/server and other models, security issues, and parallel programming on a High Performance Computing Cluster. Taking CSC 253/L before this course is preferred.  
Prerequisite: Either minimum grade of C in CSC 112 & CSC 112L or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 330L.  
Offered: every fall.

CSC 330L Operating System Design and Distributed Computing Laboratory  
Required lab for CSC 330.  
Corequisite: CSC 330L.  
Offered: 2023-24.

CSC 351 Comparative Programming Languages  
A study of programming languages and their implementations. Programming in logical and functional programming languages is included.  
Prerequisite: minimum grade of C in CSC 112 & CSC 112L or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 351L.  
Offered: spring of odd-numbered years.

CSC 351L Comparative Programming Languages Laboratory  
Required lab for CSC 351L.  
Prerequisites: minimum grade of C in CSC 112 and 112L or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 351L.  
Offered: spring of odd-numbered years.

CSC 360L Intelligent Systems Laboratory  
1 Credit  
Required lab for CSC 360L.  
Prerequisite: completion of MAT 191 or MAT 230 and minimum grade of C in either CSC 112 & CSC 112L or CSC 213 & CSC 213L. Corequisite: CSC 360L.  
Offered: fall of odd-numbered years.

CSC 371 Cybersecurity Principles  
An introduction to intelligent systems including logic and rule-based systems, machine learning, and applications of AI.  
Prerequisite: completion of MAT 191 or MAT 230 and minimum grade of C in either CSC 112 and 112L or in CSC 213 & CSC 213L. Corequisite: CSC 371L.  
Offered: fall of odd-numbered years.

CSC 371L Cybersecurity Principles Lab  
1 Credit  
Required lab for CSC 371L.  
Prerequisite: CSC 310 and CSC 310L; may be taken concurrently. Corequisite: CSC 371L.  
Offered: every fall & spring.

CSC 380 Web Development  
Web design using HTML, CSS and JavaScript. Client/server architecture with programming on both sides. Includes a rudimentary discussion of social impact, ethics and security.  
Prerequisite: minimum grade of C in CSC 111 & CSC 111L. Corequisite: CSC 380L.  
Offered: 2023-24.

CSC 380L Web Development Laboratory  
1 Credit  
Required lab for CSC 380L.  
Prerequisite: minimum grade of C in CSC 111 and 111L. Corequisite: CSC 380L.  
Offered: 2023-2024.

CSC 391 Computer Science Junior Seminar  
1 Credit  
Topic-focused exploration involving students and faculty. Prerequisite: permission of instructor.  
Offered: occasionally
CSC 395 Software Engineering  
3 Credits  
An examination of a variety of techniques and concepts that have been  
created to improve the software production process. Includes discussions of  
software processes, Agile software development, requirements engineering,  
testing, and software evolution.  
Prerequisite: minimum grade of C in CSC 213 & CSC 213L. Corequisite:  
CSC 395L.  
Offered: fall of even-numbered years.

CSC 395L Software Engineering Lab  
1 Credit  
Required lab for CSC 395.  
Prerequisite: minimum grade of C in CSC 213 and 213L. Corequisite:  
CSC 395.  
Offered: fall of even-numbered years.

CSC 400 Special Topics in Computing  
3 Credits  
Current topics of interest to faculty and students. Possible topics:  
cryptography, advanced scripting languages, networking, etc.  
Prerequisite: Minimum grade of C in CSC 281, CSC 281L, MAT 111, and in  
either MAT 191 or MAT 230. Corequisite: CSC 400L. Restriction: must be  
junior or senior Computer Science major.  
Offered: occasionally.

CSC 400L Special Topics in Computing Laboratory  
1 Credit  
Required lab for CSC 400.  
Prerequisites: Minimum grade of C in CSC 281, CSC 281L, MAT 111 and in  
either MAT 191 or MAT 230. Corequisite: CSC 400. Restriction: must be  
junior or senior Computer Science major.  
Offered: occasionally.

CSC 480 Research Experience  
0 Credits  
Research project done in conjunction with a faculty advisor.  
Offered: occasionally.

CSC 481 Research Experience  
1 Credit  
Research project done in conjunction with a faculty advisor for credit.  
Offered: occasionally.

CSC 491 Computer Science Senior Seminar  
1 Credit  
Topic-focused exploration involving students and faculty.  
Prerequisite: permission of instructor.  
Offered: occasionally.

CSC 497 Internship  
1-3 Credits  
Special projects for local institutions/businesses. Must be related to  
a specific focused task and involve a significant learning component.  
Internships require an application and approval by the associate dean. Credit  
is not given simply for a part-time job. Approved project proposal and results  
documentation required. Does not count as a CSC elective.  
Prerequisite: permission of program director & associate dean.  
Offered: occasionally.

CSC 498 Independent Project  
3 Credits  
A directed project course that includes research, design, and  
implementation of a software system.  
Prerequisite: permission of instructor.  
Offered: occasionally.

CSC 499 Independent Study  
1-4 Credits  
An in-depth study of a specific computing topic. Independent studies  
require an application and approval by associate dean.  
Prerequisite: junior or senior standing; & permission of instructor, program  
director, & associate dean.  
Offered: occasionally.
