COMPUTER SCIENCE (BS)

Chair: Jeffrey J. McConnell, PhD

Introduction
A degree in computer science from Canisius College provides you with the experience and background required to continue with graduate school or to find employment in a variety of fields. Our graduates enjoy challenging and lucrative careers all over the country in many types of companies, from banking to the defense industry, from startups to major corporations. The computer science major provides you with an essential theoretical background along with practical programming experience and knowledge about many of the important and cutting edge areas of computer science, including cybersecurity, artificial intelligence, web development, software engineering, databases, operating systems, distributed computing, programming language design, and the social impact of computing.

For a more detailed description of the program, faculty, facilities, academic and co-curricular opportunities please go to the Computer Science website (https://www.canisius.edu/academics/programs/computer-science/).

Qualifications
Students must maintain a 2.0 GPA in the major and a 2.0 overall average to graduate with a degree in Computer Science.

Advisement
All students should have an advisor in the major and should contact the department directly to have an advisor assigned if they do not already have one. Meetings with academic advisors are required prior to students receiving their PIN for course registration each semester. All majors should work closely with their advisor in discussing career expectations, choosing their major electives, developing their entire academic program and planning their co-curricular or supplemental academic experiences.

Double Majors
Students who wish to expand their educational opportunities may decide to declare a double major. This decision may be based on career goals, planned graduate studies, and/or other student interests. Before a student declares a double major, it is important to meet with the appropriate academic departments for advisement. In order to declare a double major, the student must complete the appropriate double major request form and get the signature of each department chairperson and the appropriate associate dean.

Per college policy, each additional major requires a minimum of 15 credits that do not apply to the student’s first or subsequent major. Some double major combinations can be completed within the minimum 120 credit hour degree requirement, but in other cases additional course work may be required. Please note that students will receive only one degree, regardless of the number of majors they complete.

In the past, Computer Science majors have had double majors in many other areas, including Physics (http://catalog.canisius.edu/undergraduate/college-arts-sciences/physics/), Mathematics (http://catalog.canisius.edu/undergraduate/college-arts-sciences/mathematics-statistics/), Digital Media Arts (http://catalog.canisius.edu/undergraduate/college-arts-sciences/digital-media-arts/), Religious Studies (http://catalog.canisius.edu/undergraduate/college-arts-sciences/religious-studies-theology/), English (http://catalog.canisius.edu/undergraduate/college-arts-sciences/english/), and Classics (http://catalog.canisius.edu/undergraduate/college-arts-sciences/classics/).

Minors in Other Disciplines
Minors provide students the opportunity to pursue additional interests but generally do not require as many courses as a major. Minors generally range from five to eight required courses. The minors page (http://catalog.canisius.edu/undergraduate/minors/) provides a complete list of minors and provides links to each minor. Some majors and minors can be completed within the minimum 120 credit hour degree requirement, but in some cases additional coursework may be required. Students must complete the appropriate minor request form.

Students following the Interdisciplinary Track are required to complete a minor outside of computer science. A double major also satisfies this requirement. Students in the Science Track are not required to complete a minor but may choose to do so.

Curriculum
An Ignatian Foundation
All undergraduate students must complete either the Canisius Core Curriculum (http://catalog.canisius.edu/undergraduate/academics/curricular-information/core-curriculum/) or the All-College Honors Curriculum (http://catalog.canisius.edu/undergraduate/academics/curricular-information/all-college-honors-program/). Many schools refer to their college-wide undergraduate requirements as “general education” requirements. We believe that the core curriculum and the honors curriculum are more than a series of required classes; they provide the basis for a Jesuit education both with content and with required knowledge and skills attributes that are central to our mission.

Free Electives
Students may graduate with a bachelor’s degree in Computer Science with more but not less than 132 credit hours. Free electives are courses in addition to the Canisius Core Curriculum or All-College Honors Curriculum and major requirements sufficient to reach the minimum number of credits required for graduation. The number of credits required to complete a bachelor’s degree may vary depending on the student’s major(s) and minor(s).

Major Requirements

</tbody>
</table>
CSC 351 & 351L Comparative Programming Languages and Comparative Programming Languages Laboratory 4
CSC 360 & 360L Intelligent Systems and Intelligent Systems Laboratory 4
CSC 395 & 395L Software Engineering and Software Engineering Lab 4
Major Elective at the 300- or 400-level (see list below) 3-4
MAT 111 Calculus I 4
MAT 191 or MAT 230 Introduction to Discrete Mathematics Logic, Set Theory, and Proofs 4
Completion of either the science track or interdisciplinary track curriculum (variable credit required)

Total Credits 54-55

Major Elective Options
One additional course at the 300/400 level is required. These courses cover a variety of topics including web programming, advanced object oriented programming and design patterns, cryptography, app development, graphics, numerical analysis and bioinformatics. All these courses are either 3 or 4 credits. Faculty teach these courses on a rotating basis. To determine what is offered each semester consult the class schedule. Recent major electives include:

<table>

</tr>
<tr>
<td>CSC 400 &amp; 400L</td>
<td>Special Topics in Computing and Special Topics in Computing Laboratory</td>
<td>4</td>
</tr>
<tr>
<td>MAT 341</td>
<td>Numerical Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>

Tracks
Students must complete one of the following two tracks:

Interdisciplinary Track
Completion of an approved major or minor in another department or program.

Science Track
Select one of the following sequences: 8

Biology Sequence:
BIO 111 & 111L Introductory Biology I and Introductory Biology Laboratory I
BIO 112 & 112L Introductory Biology II and Introductory Biology Laboratory II

Chemistry Sequence:
CHM 111 & 111L General Chemistry I and General Chemistry I Laboratory 1
CHM 112 & 112L General Chemistry II and General Chemistry II Laboratory

Physics Sequence:
PHY 223 & 223L General Physics for Physical Science Majors I and General Physics for Physical Science Majors I Laboratory

Total Credits 15-16

1 Students can complete CHM 109 and CHM 110 in lieu of CHM 111.

Many courses at the 300-level and above are offered every two years on a rotating schedule. Thus, some students will take, for example, CSC 330 in their junior year, while the students who entered the previous year will take CSC 330 in their senior year.

The CSC department maintains a lab for use by majors and minors that contains a number of computers that provide access to departmental and college-wide software along with a printer.

CSC majors often get part-time jobs or paid internships in the Western New York region while still taking classes, though we do not formally require an internship. CSC 497 “Internship” is a way to earn credit for an internship, but the experience must include a significant learning component that does not overlap with required coursework and must be pre-approved by the department chair. The Internship cannot count as the CSC elective.

Roadmap
Recommended Semester Schedule for Major Course Requirements

Freshman
Fall
CSC 111
& 111L
MAT 111 or 191
Spring
CSC 112
& 112L
Track course

Sophomore
Fall
CSC 213
& 213L
CSC 281
& 281L
Spring
CSC 253
& 253L
Track course

Take one of the following MAT courses as needed:
MAT 110 (If needed)

Junior
Fall
Select one:
CSC 330
& 330L
Spring
CSC 310
& 310L
Track course

CSC 320
CSC elective (1 needed)

Track course
CSC Elective (1 needed)
## Learning Goals & Objectives

### Student Learning Goal 1
**Majors will develop a computational solution to a problem.**

**Students will:**
- Objective A: Translate a problem description to a formal representation;
- Objective B: Implement, justify and test acceptable computational solutions;
- Objective C: Describe the basic principles of artificial intelligence (AI).

### Student Learning Goal 2
**Majors will know the foundations of computing.**

**Students will:**
- Objective A: Identify computational power and its limits;
- Objective B: Describe the operational details of computer systems;
- Objective C: Describe the operational details of programming languages.

### Student Learning Goal 3
**Majors will understand the social impact of computing.**

**Students will:**
- Objective A: Describe the social impact of computing.

## Minors
**The following two minors are offered:**
- Computer Science Minor (http://catalog.canisius.edu/undergraduate/college-arts-sciences/computer-science/computer-science-minor/)
- Computer Theory Minor (http://catalog.canisius.edu/undergraduate/college-arts-sciences/computer-science/computer-theory-minor/)

</tbody>
</table>
CSC 310 Information Organization and Processing 3 Credits
Databases, high-level organization and processing of information, SQL, and modern NoSQL systems.
Prerequisite: minimum grade of C in CSC 112 & CSC 112L or or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 310L.
Offered: every fall & spring.

CSC 310L Information Organization and Processing Laboratory 1 Credit
Required lab for CSC 310.
Prerequisite: minimum grade of C in CSC 112 and CSC 112L or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 310L.
Offered: occasionally.

CSC 320 The Social Impact of Computing 3 Credits
Examines the societal issues involved in computing such as accessibility, ethical issues, privacy, censorship, social media, and professional responsibilities. Includes applications of information literacy techniques to the major.
Prerequisite: minimum grade of C in CSC 112 & CSC 112L or or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 320L.
Fulfills College Core: Advanced Writing-Intensive
Offered: once a year.

CSC 330 Distributed Computing 3 Credits
The design of operating system software, distributed applications, client/server and other models, security issues, and parallel programming on a High Performance Computing Cluster.
Prerequisite: CSC 253, CSC 253L, & either minimum grade of C in CSC 112 & CSC 112L or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 330L.

CSC 330L Distributed Computing Laboratory 1 Credit
Required lab for CSC 330.
Prerequisite: CSC 253, CSC 253L, & (minimum grade of C in CSC 112 & CSC 112L or or minimum grade of C in CSC 213 & CSC 213L). Corequisite: CSC 330L.
Offered: occasionally.

CSC 351 Comparative Programming Languages 3 Credits
A study of programming languages and their implementations. Programming in logical and functional programming languages is included.
Prerequisite: minimum grade of C in CSC 112 & CSC 112L or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 351L.

CSC 351L Comparative Programming Languages Laboratory 1 Credit
Required lab for CSC 351.
Prerequisite: minimum grade of C in CSC 112 and 112L or or minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 351L.
Offered: spring of odd-numbered years.

CSC 360 Intelligent Systems 3 Credits
An introduction to intelligent systems including logic and rule-based systems, machine learning, and applications of AI.
Prerequisite: completion of MAT 191 or MAT 230 and minimum grade of C in either CSC 112 & CSC 112L or CSC 213 & CSC 213L. Corequisite: CSC 360L.

CSC 360L Intelligent Systems Laboratory 1 Credit
Required lab for CSC 360.
Prerequisite: completion of MAT 191 or MAT 230 and minimum grade of C in either CSC 112 and 112L or in CSC 213 & CSC 213L. Corequisite: CSC 360L.
Offered: occasionally.

CSC 371 Cybersecurity Principles 3 Credits
This course examines the landscape and the broad areas of cybersecurity which includes topics such as: Symmetric & Public-Key Encryption, Access Control, Database Security, Malware, DoS (Denial-of-Service) Attacks, Intrusion Detection & Firewalls, Software Security, Security Management & Policies, Internet Security, and Legal & Ethical Aspects of Cybercrime. Students will also complete hands-on labs and exercises to reinforce their working knowledge of computer, network and information security topics.
Prerequisite: CSC 310 and CSC 310L; may be taken concurrently.
Corequisite: CSC 371L.
Offered: every fall.

CSC 371L Cybersecurity Principles Lab 1 Credit
Required lab for CSC 371.
Prerequisite: CSC 310 and CSC 310L; may be taken concurrently.
Corequisite: CSC 371.
Offered: occasionally.

CSC 372 Ethical Hacking and Network Defense 3 Credits
This course provides an in-depth understanding of how to effectively protect computer networks. Students will learn the tools and penetration testing methodologies used by ethical hackers. In addition, the course provides a thorough discussion of what and who an ethical hacker is and how important they are in protecting corporate and government data from cyber attacks. Students will learn updated computer security resources that describe new vulnerabilities and innovative methods to protect networks. Also covered is a thorough update of federal and state computer crime laws, as well as changes in penalties for illegal computer hacking.
Prerequisite: CSC 213, CSC 213L, CSC 310, CSC 310L. Corequisite: CSC 372L.
Offered: every spring.

CSC 372L Ethical Hacking and Network Defense Lab 1 Credit
Required Lab for CSC 372
Prerequisite: CSC 213, CSC 213L, CSC 310 and CSC 310L. Corequisite: CSC 372.
Offered: every spring.

CSC 380 Web Development 3 Credits
Web design principles, programming and scripting (both client-side and server-side), client/server mechanisms, search engines, and security.
Prerequisite: minimum grade of C in CSC 111 & CSC 111L. Corequisite: CSC 380L.

CSC 380L Web Development Laboratory 1 Credit
Required lab for CSC 380.
Prerequisite: minimum grade of C in CSC 111 and 111L. Corequisite: CSC 380.
Offered: every spring.

CSC 391 Computer Science Junior Seminar 1 Credit
Topic-focused exploration involving students and faculty.
Prerequisite: permission of instructor.

CSC 395 Software Engineering 3 Credits
An examination of a variety of techniques and concepts that have been created to improve the software production process. Includes discussions of software processes, Agile software development, requirements engineering, testing, and software evolution.
Prerequisite: minimum grade of C in CSC 213 & CSC 213L. Corequisite: CSC 395L.

CSC 395L Software Engineering Lab 1 Credit
Required lab for CSC 395.
Prerequisite: minimum grade of C in CSC 213 and 213L.Corequisite: CSC 395.
CSC 400 Special Topics in Computing  
3 Credits  
Current topics of interest to faculty and students. Possible topics: cryptography, advanced scripting languages, networking, etc.  
Prerequisite: Minimum grade of C in CSC 281, CSC 281L, MAT 111, and in either MAT 191 or MAT 230. Corequisite: CSC 400L. Restriction: must be junior or senior Computer Science major.  

CSC 400L Special Topics in Computing Laboratory  
1 Credit  
Required lab for CSC 400.  
Prerequisite: Minimum grade of C in CSC 281, CSC 281L, MAT 111 and in either MAT 191 or MAT 230. Corequisite: CSC 400L. Restriction: must be junior or senior Computer Science major.  
Offered: every spring.

CSC 480 Research Experience  
0 Credits  
Research project done in conjunction with a faculty advisor.  
Offered: every fall & spring.

CSC 481 Research Experience  
1 Credit  
Research project done in conjunction with a faculty advisor for credit.  
Offered: every fall & spring.

CSC 491 Computer Science Senior Seminar  
1 Credit  
Topic-focused exploration involving students and faculty.  
Prerequisite: permission of instructor.

CSC 497 Internship  
1-3 Credits  
Special projects for local institutions/businesses. Must be related to a specific focused task and involve a significant learning component. Internships require an application and approval by the associate dean. Credit is not given simply for a part-time job. Approved project proposal and results documentation required. Does not count as a CSC elective.  
Prerequisite: permission of chair & associate dean.

CSC 498 Independent Project  
3 Credits  
A directed project course that includes research, design, and implementation of a software system.  
Prerequisite: permission of instructor.

CSC 499 Independent Study  
1-4 Credits  
An in-depth study of a specific computing topic. Independent studies require an application and approval by associate dean.  
Prerequisite: junior or senior standing; & permission of instructor, chair, & associate dean.
