<td></td>
<td>every fall &amp; spring</td>
</tr>
<tr>
<td>ISB 305</td>
<td>Strategic Modeling &amp; System Dynamics</td>
<td>3</td>
<td>Strategic modeling uses computer simulations and other modeling techniques to understand business, environmental, and public policy problems. This course provides an introduction to systems thinking and system dynamics. “Systems thinking” is a way of viewing the world, understanding relationships and gaining insights into problems and opportunities. Viewing the world from a system perspective is an imperative for tomorrow’s leaders since solving complex, social problems involves an interdisciplinary approach. Modeling will be used to cover topics such as supply chains, inventory management, business growth, environmental sustainability, strategic management and various public policy issues.</td>
<td>ISB 101</td>
<td>occasionally</td>
</tr>
<tr>
<td>ISB 340</td>
