SOCIOLOGY - SOC

SOC 100 The Architecture of Identity: Sociological and Literary Perspectives 3 Credits
What shapes our cultural and personal identities? What is the interplay of cultural and personal identities? How do we know? The theme of identity is central to any society and one we consistently consider along the pathways of our individual lives. It is a particular theme for those entering college and looking for a pathway to their future. This interdisciplinary course explores the social construction of identity in the hope that the intellectual issues we engage will give rise to personal insights for those looking for the most rewarding pathway forward in life. We will rely on a sociological approach to create a research-based perspective on what we have learned on the social construction of identity. What stories does the research reveal? At the same time, we will rely on the humanities— including fiction, literary non-fiction, memoir, documentary and film, media and art— to further illustrate the cultural narratives of identity that sociological research reveals as validating or denying and marginalizing us as individuals.
