ACCOUNTING INFORMATION SYSTEMS (BS)

Introduction
Accounting Information Systems (BS)
Chair: Ian J. Redpath, JD, LLM

The Accounting Information Systems program is part of the Richard J. Wehle School of Business (https://www.canisius.edu/academics/our-schools/richard-j-wehle-school-business) and is accredited by the prestigious Association to Advance Collegiate Schools of Business (AACSB). As a Jesuit institution, you will also take a strong core of courses that emphasizes writing skills, logic and breadth of knowledge about the human experience. The Jesuit tradition of developing both intellect and character translates into accounting professionals who concern themselves with not only the financial health of an organization but also its professional integrity and its contribution to society as a whole.

The Accounting Information Systems (AIS) Program is designed for students to gain the knowledge and skills required to bridge the gap between accounting and technology. The AIS program emphasizes a student's developing in demand skills in the areas of data analytics, business process knowledge and information technology risk assessment. AIS is a unique program, started in 2002, as one of only 30 schools offering similar programs in the U.S. AIS majors are often dual majors with accounting who join the AIS program after starting at Canisius while some students major only in AIS. The AIS major skills are in demand in the marketplace. Some AIS graduates choose careers in technical positions such as an Information Systems Auditor for high paying jobs with public accounting firms and financial institutions. These positions typically pay higher starting salaries than the entry level accounting positions. Other graduates use their AIS knowledge to supplement their accounting skills to enhance their performance in their professional careers and improve the chances of landing their first professional position.

From its inception, the AIS program has strived to reinforce concepts with state of the art technology that expands the career opportunities of our graduates. More recently, in 2013, Canisius College joined the SAP University Alliance (http://scn.sap.com/community/uac) which enables the college to use SAP software for instructional purposes. SAP is the worldwide leader in enterprise resource planning (ERP) software solutions. Students benefit from hands on use of SAP software throughout the AIS program. The SAP initiative was made possible through partnerships with local businesses.

Courses are taught by full-time faculty members who bring real-world knowledge to the classroom through their experiences as accounting and systems professionals. You will benefit from the department’s close ties with business leaders who often provide internship opportunities, permanent jobs, and valuable advice. Additional information is available at the Accounting Information Systems website (https://www.canisius.edu/academics/programs/accounting-information-systems).

Curriculum
An Ignatian Foundation
All undergraduate students must complete either the Canisius Core Curriculum (http://catalog.canisius.edu/undergraduate/academics/curricular-information/core-curriculum) or the All-College Honors Curriculum (http://catalog.canisius.edu/undergraduate/academics/curricular-information/all-college-honors-program). Many schools refer to their college-wide undergraduate requirements as “general education” requirements. We believe that the core curriculum and the honors curriculum are more than a series of required classes; they provide the basis for a Jesuit education both with content and with required knowledge and skills attributes that are central to our mission.

Free Electives
Students may graduate with more but not less than 120 credit hours. Free electives are courses in addition to the Canisius Core Curriculum or All-College Honors Curriculum and major requirements sufficient to reach the minimum of 120 credit hours required for graduation.

1 Ethics Required

ACC 211 Principles of Accounting I
For Accounting Majors. Fundamental concepts and procedures of financial
accounting with emphasis on asset and liability valuations and income
determination.
Offered: fall & spring.

ACC 212 Principles of Accounting II
For Accounting Majors. Fundamental concepts and procedures of financial
and managerial accounting with emphasis on asset funding, including
debt and equity and cash flows. Accounting applications of present value
concepts, introduction to budgeting and product costing. During the Spring
semester the course has a mandatory 1 hour non-credit recitation section
for preparation for the intermediate accounting series.
Prerequisite: minimum grade of C- in ACC 201.
Offered: spring & summer

ACC 301 Intermediate Accounting I
First of a two-course sequence. In-depth accounting concepts and theories
pertaining to external financial reporting. Emphasis on theories surrounding
asset valuations, liability and equity measurements, income determination
and cash flows.
Prerequisite: minimum grade of C- in both ACC 201 & ACC 212, junior
standing, & overall GPA of 2.0.
Offered: fall & spring.

ACC 303 Cost Accounting
Preparation and analysis of data utilized by management in planning and
control decisions. Inventory valuation and reporting methods. Establishment
and use of standards and budgets. The department offers ACC 303PD
sections. These sections have a mandatory professional development lab
attached to them. Their objective is to guide students as they develop the
communication and leadership skills valued by the accounting profession.
The course has a mandatory 3 hour non-credit recitation section.
Prerequisite: ACC 212, junior standing, & an overall GPA of 2.0.
Offered: fall & spring.

ACC 307 Accounting Information Systems
Development, organization, and implementation of accounting and
management information systems. Emphasis on enterprise risk management,
systems controls, processing cycles, and systems development life cycle.
Prerequisite: ACC 201 & ISB 101.
Offered: fall & spring.

ACC 331 E-Business
Overview of electronic business transactions emphasizing concepts and
foundations underlying data analytics for accounting. Course provides
theoretical foundations of business intelligence, descriptive analytics, data
visualization, and predictive analytics. Students apply data analytic concepts
through the use of analytics software.
Prerequisite: ACC 307 (may register concurrently).
Offered: spring.

ACC 426 Information Systems Auditing
Information system control design and auditing in the internet, electronic
and paperless environment; management of security technology; operating
and application system processing controls; prevention of unauthorized
activity.
Prerequisite: minimum grade of C- in each of ACC 307 & one of the
following: ACC 331, ACC 452, or ACC 425.
Offered: fall.

ACC 452 Enterprise Systems
Evaluating enterprise information, enterprise resource planning (ERP)
system design and functionality, data integrity, use of financial and non-
financial information for organizational decision-making, business process
improvement and risk management.
Prerequisite: minimum grade of C- in ACC 307.
Offered: spring.

ISB 340 Database Management Systems
Design and application of database management systems. Topics include
structured query language (SQL), data structures, querying and report
writing, database design and administration, data mining and security.
Prerequisite: ISB 101 or equivalent.
Offered: every fall.
